

## Refurbishment Project - Update

Written by Administrator

Monday, 21 September 2015 12:49 - Last Updated Saturday, 13 August 2016 12:34

---

In September 2015, a significant refurbishment project was commenced around the clubhouse. This work has been long planned and following a long and protracted fund finding process, we were able to commence the works on Monday 14th September. The works are geared towards achieving dual objectives of longevity and access improvement. In short, the building will have external insulation attached and that will then be finished in a clean white render/roughcast finish. We will also be providing a pedestrian only pathway to the building and the back doors, with appropriate lighting. Finally the building will have new external lighting and the shutters will be motorised, providing suitable safe environment for people opening, closing and using the building.

***Between 14th September and 25th September, access for our members will be via the back door, accessed by walking along the grass at the front of the building towards the containers. We apologise for the inconvenience this may cause.***

We have created a page to watch the progress of the works being completed..... Please feel free to have a look [HERE](#) and watch the progress over the next few weeks....
